BAUHOF HAS BUILT ITS UNIFIED THREAT MANAGEMENT WITH WATCHGUARD SOLUTIONS

INFORMATION ABOUT THE CLIENT

Bauhof is the largest retailer of construction materials and gardening goods in Estonia. Bauhof is based on the international DIY-concept (do it yourself) and has 13 stores in Estonia. Attractive pricing, the best product range, fast service, and convenient store locations with free parking make Bauhof a pleasant place for individual and business customers to make their purchases. In addition to the professional product selection, Bauhof provides its customers with an inspirational shopping environment and products. Bauhof's mission is to ease the purchasing of construction materials and gardening goods

THE CHALLENGE

Bauhof approached Adventus Solutions with the following challenge: their firewall was outdated, putting their data, systems and even effective operation at risk.
Their team approached the task proactively and positively with solutions that aimed to provide:

- Effective backup
- Antivirus, antispam, IPS and cloud services to protect against threats
- Network architecture
- Improved management of network systems

PRODUCTS, SOLUTIONS AND SERVICES

Adventus Solutions rolled-out a modern UTM (unified threat management) service with backup for customer. This included:

- Watchguard XTM 525 cluster
- Watchguard XCS extensible content security
- Managed solutions (2 devices & full support and services)

"Network threats can arise anywhere and at any time. Worst of all, such threats can take your system down before you even know they're there. That's why you need the peace of mind of a network security solution that's efficient and effective. We implemented WatchGuard because of its unique architecture, which gave us a smart, fast, and managed solution with a range of extended options. It is simply the stand-out solution on the market. First impressions count - Adventus Solutions immediately understand our expectations and requirements. We were impressed by their qualified, knowledgeable and experienced specialists which provided services of the highest professional level."

Julia Ležeiko
IT Manager
Bauhof

BUSINESS AND TECHNICAL BENEFITS

- All Bauhof shops are now connected in one local area network – and all traffic is routed through a WatchGuard firewall: internet connections, cashier systems, etc.
- A tremendous advantage for customer that the most up-to-date WatchGuard solution was implemented – with additional options too.
- An additional advantage is that the managed solutions mean that customer can optimized network security costs.
- The perfect combination of effectivity and efficiency by renting a unified threat management solution.
